Amendments to the Claims:

- 1-17. (Withdrawn)
18. (Currently Amended) An isolated nucleotide sequence selected from the group consisting of:
- (a) a nucleotide sequence comprising the sequence set forth in SEQ ID NO:3;
 - (b) a nucleotide sequence having at least ~~75%~~ 95% identity to SEQ ID NO:3, wherein said nucleotide sequence is capable of regulating transcription; and,
 - (c) ~~a nucleotide sequence comprising at least 20 contiguous nucleotide sequences of SEQ ID NO:3, wherein said nucleotide sequence is capable of regulating transcription.~~
19. (Original) A DNA construct comprising a promoter having the nucleotide sequence of claim 18 operably linked to a nucleotide sequence of interest.
20. (Original) An expression vector comprising the DNA construct of claim 19.
21. (Currently amended) A plant having stably incorporated into its genome at least one DNA construct comprising a nucleotide sequence of interest operably linked to a promoter, wherein said nucleotide sequence of interest is heterologous to said promoter and wherein said promoter is selected from the group consisting of:
- (a) a promoter sequence comprising the sequence set forth in SEQ ID NO:3;
 - (b) a promoter sequence having at least ~~75%~~ 95% identity to SEQ ID NO:3 wherein said promoter sequence regulates transcription of said heterologous nucleotide sequence of interest; and,
 - (c) ~~a nucleotide sequence comprising at least 20 contiguous nucleotide sequences of SEQ ID NO:3, wherein said nucleotide sequence is capable of regulating transcription.~~
22. (Original) A plant cell having the vector of claim 20.
23. (Currently amended) A method of regulating the expression of a nucleotide sequence of interest, said method comprising stably incorporating in the genome of a plant cell a nucleotide sequence of interest operably linked to a promoter comprising a the nucleotide

sequence of claim 18, wherein said nucleotide sequence of interest is heterologous to said promoter.

24. (Currently amended) The method of claim 23, further comprising contacting said plant cell with a ~~stimuli~~ stimulus that induces expression of said nucleotide sequence of interest.
